

Nantucket Garden Club, Horticulture Report, 2024

Our Horticulture speaker, Page Dickey, was well received by our members and guests on July 24. Speaking elegantly with illustrative photographs Page presented her book, Uprooted--the story of her experience moving North from a complicated garden of her own making in Connecticut which had become a burden, to a vast property of open fields and woods. Many members could relate to changing from a home and community that Page had loved for many years to a new challenging situation, with a stimulating and gratifying result.

Other activities relating to horticulture, each lead by chairmen and separate committees, were the Daffodil Show in April, the Green Thumb Flower Show in July, the House Tour in August which features many stunning gardens and finally the marvelous garden of native plants at the Salt Marsh Center, a three-year project. Lead by our determined past president Paulette Boling the garden has received awards from the Garden Club and many other conservation and preservation organizations as well.
